**GENERAL DESCRIPTION:** ENVIRO 2000 SOLID DRAINZYME is a super concentrated, advanced technology drain line and grease trap treatment for cleaning and maintaining these systems without hazardous chemicals. The formulation contains the latest blend of fast acting, non-toxic complex bacterial spores which activate in the presence of grease and organic matter to form enzyme generating bacteria which are engineered to thrive in aerobic and anaerobic environments. As part of a regular treatment program, these special bacteria form a continuously acting colony which creates a complete active enzyme system to break down and digest grease and organic materials, keeping grease traps, drain lines and septic tanks clear and free-flowing and odor free.

**USE DIRECTIONS:** ENVIRO 2000 SOLID DRAINZYME is a highly concentrated bacterial spore blend in solid dormant form containing over one billion CFUs per gram. It is activated upon dilution with water as it is fed into the grease trap, drain line or septic system. This product should only be used in a suitable dispensing system consisting of a solid bowl and recycling timer which will be supplied and installed by your service technician. After the initial dosing, DRAINZYME SOLID is automatically fed into your system on a daily basis, preferably at night or other time of limited drain usage. Regular use of DRAINZYME SOLID will control odors and clogging.

**GREASE TRAPS:** For traps less than 150 gallons of tank capacity, add 3/4 of an ounce of SOLID DRAIN-ZYME daily, by injecting it into sink drain line or floor drain close to the grease trap. For larger grease traps, add 1 1/2 ounces of SOLID DRAIN-ZYME daily for every 500 gallons of tank capacity. SOLID DRAIN-ZYME should be injected at night when the traps are used the least.

**DRAIN LINES:** For best results, inject SOLID DRAIN-ZYME daily. Add product in amounts listed below by injecting SOLID DRAIN-ZYME directly into the drain pipe starting on the lowest floor and working up at a rate of one floor every day. When the top floor is reached, continue treatment from the top floor only.

**ODOR CONTROL:** SOLID DRAIN-ZYME is highly effective at controlling the odors associated with urine, feces, vomit, spoiled foods, etc. SOLID DRAIN-ZYME should be diluted 1-2oz. per gallon. Remove excess soil deposits and spray thoroughly.

SOLID DRAIN-ZYME can be used safely on any surface not harmed by water alone: including concrete, carpet grout, wood, stainless steel, Formica, vinyl, porcelain, and linoleum.

**Carpet:** May be applied with a shampoo machine (do not mix with shampoo). Apply 3-4 hours prior to shampooing. Soil extraction method recommended.

**Garbage trucks and cans:** For best results, spray on at day's end. Rinse before using next day.

#### WARNING

KEEP OUT OF REACH OF CHILDREN.

Concentrated solution of this product may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. In case of contact with eyes, flood repeatedly with water and call physician. Avoid contamination of food.

May be harmful if swallowed. Can cause eye or skin irritation. Rubber gloves should be worn when using this product.

#### PACKAGING:

2x5lb capsules/case - 10lbs. net. wt.

#### RE-ORDER CODE: SDZ

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
