GENERAL DESCRIPTION: JIFFY RTU is a fast, versatile, effective cleaner for food processing operations, JIFFY RTU is a unique combination of synthetic detergent and inorganic acid. It rapidly penetrates and removes mineral deposits and hard water films. It cleans and brightens metals quickly and easily, saving time, work, and manpower. Recommended for use on stainless steel

JIFFY RTU is formulated for multiple cleaning operations. It can be used for manually cleaning such process equipment as stainless steel table tops, counters, food preparation equipment, tanks and piping. It is recommended for removing film and scale deposits on stainless steel.

DO NOT mix with bleach, chlorinated cleaners or anything except water.

PHYSICAL PROPERTIES:

Chemical composition Soil suspending agents,
anti redeposition agents,
inorganic acid compounds,
wetting agents.

pH 1.7
pH of 1% solution 2.2
Specific Gravity 1.0(8.34 pounds per gallon)
Solubility Complete and fast
Rinsing Complete
Viscosity Like water
Foam High
Wetting AbilityExcellent
Inorganic Acids>50%
Stability 1 Year @ Ambient Temperature

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

INSTRUCTIONS FOR USE:

Ice Machines: The equipment should be pre-cleaned with An alkaline cleaner followed by a rinse. A solution of 2 8 oz. of JIFFY RTU per gallon of water should then be circulated and brushed on all surfaces. Allow to soak for an additional 10 minutes. Rinse thoroughly with clean water and allow to circulate for an additional 2 minutes.

Food Service Equipment:

Follow use directions of technical service representative
